Update

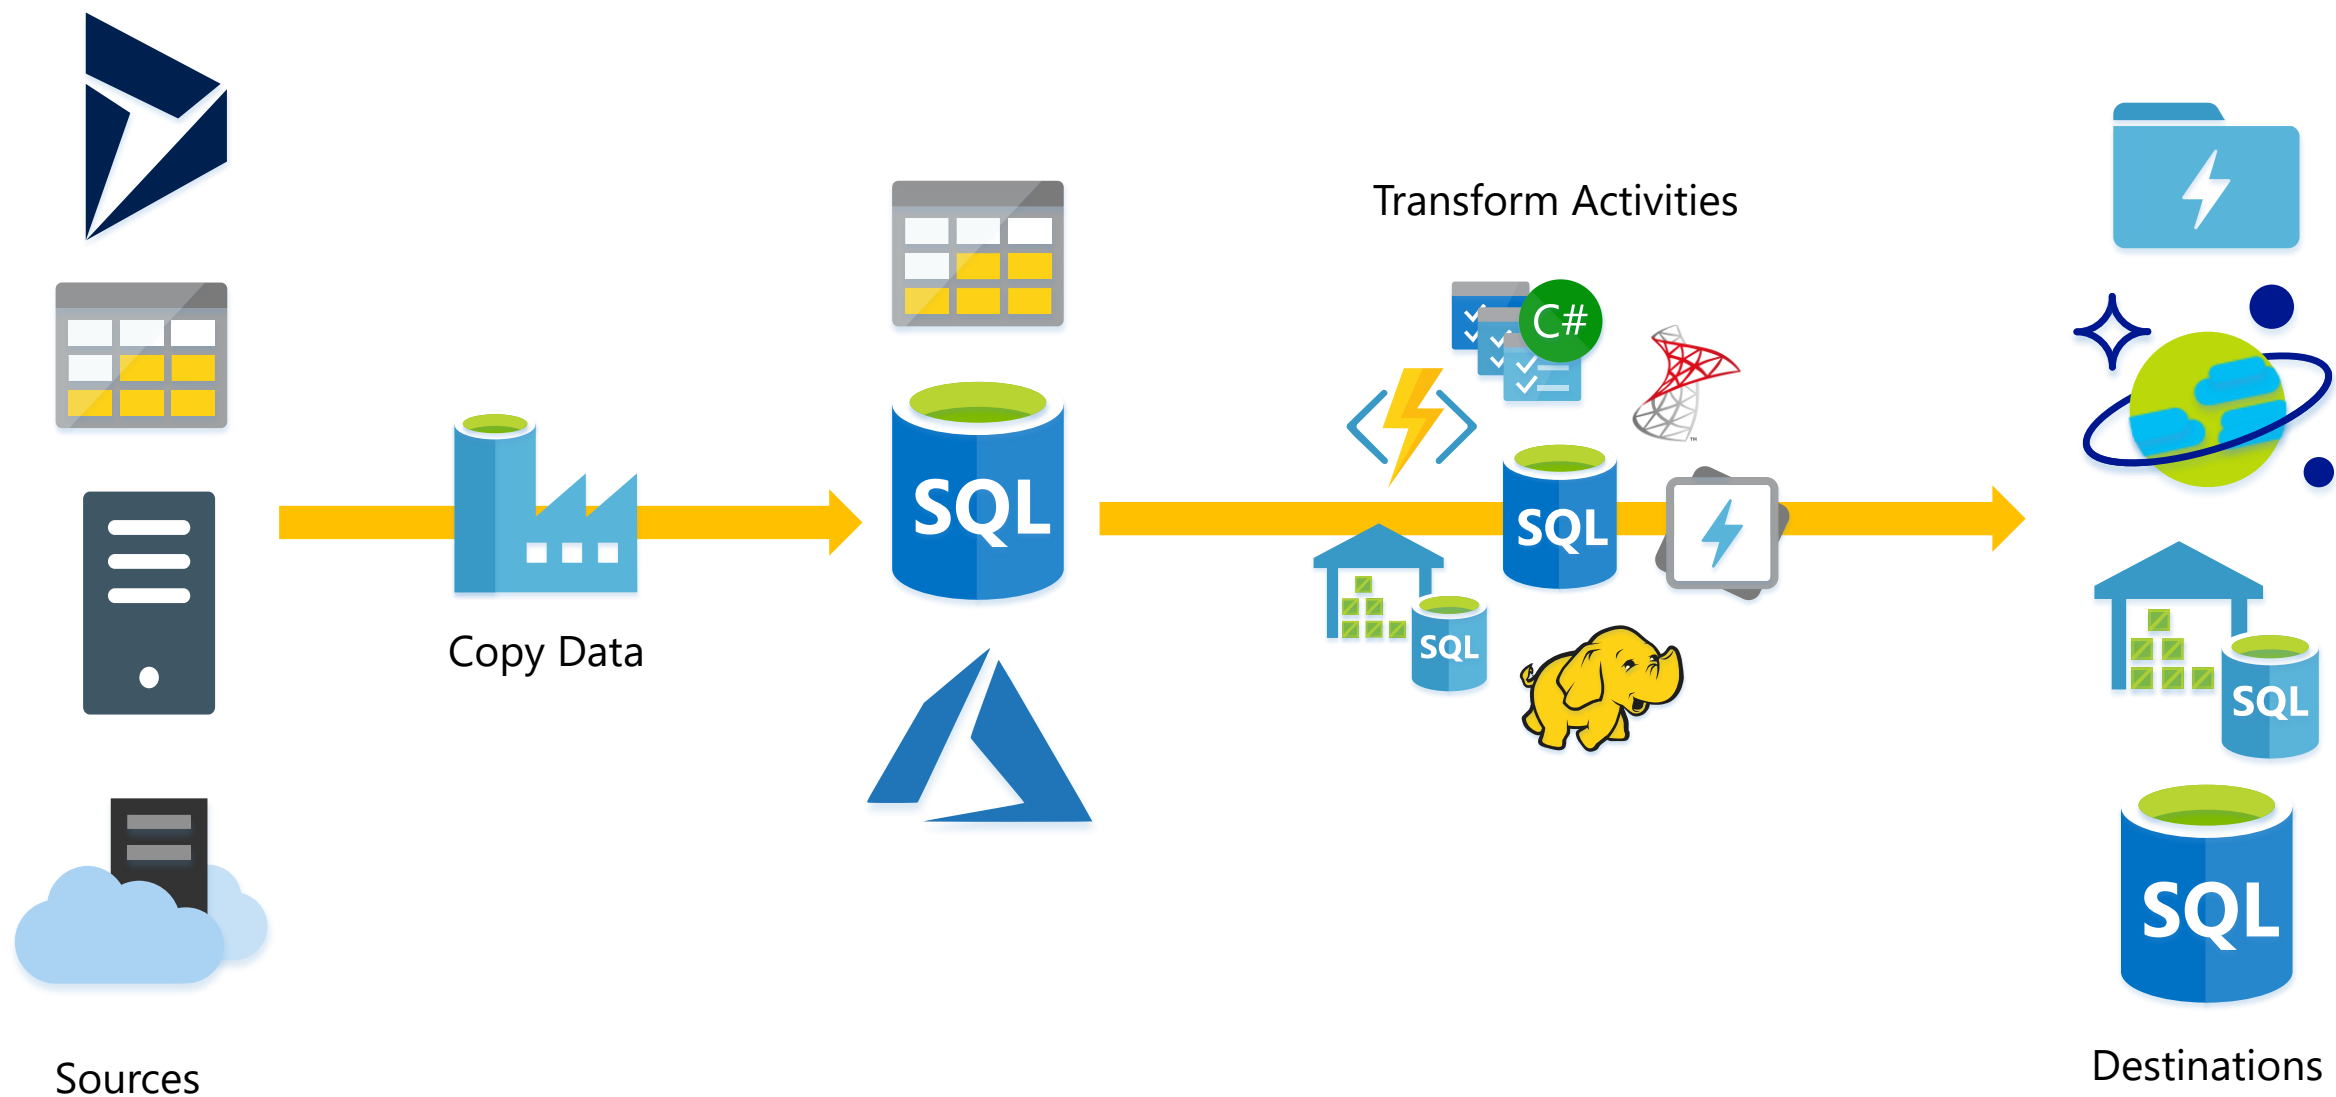

SSIS in Azure

Design Patterns &  
Conclusions

# What is Azure Data Factory?

# What is Azure Data Factory?

# Data Factory Components

## 1 Linked Services – How do I connect?

Think SSIS Connection Managers!

SQLDBLinkedService

ConnectionString: *Server=MyServer;Database=myDataBase*  
UserName: *"Simon"*  
Password: *\*\*\*\*\**

# Data Factory Components

1

## Linked Services

2

**Data Sets** – What slices/partitions does my data have?

dbo.DimCustomer

/RAW/Orders/2018/01/01/Orders.csv

# Data Factory Components

## U-SQL Activity

Script: *wasb://:myscripts/ProcessOrders.usql*

AUs: *5 units*

Priority: *1000*

Parameters: *@Output = "RAW/Orders/..."*

1

**Linked Services**

2

**Data Sets**

3

**Activities** – What actions am I taking?

# Data Factory Components

1

**Linked Services**

2

**Data Sets**

3

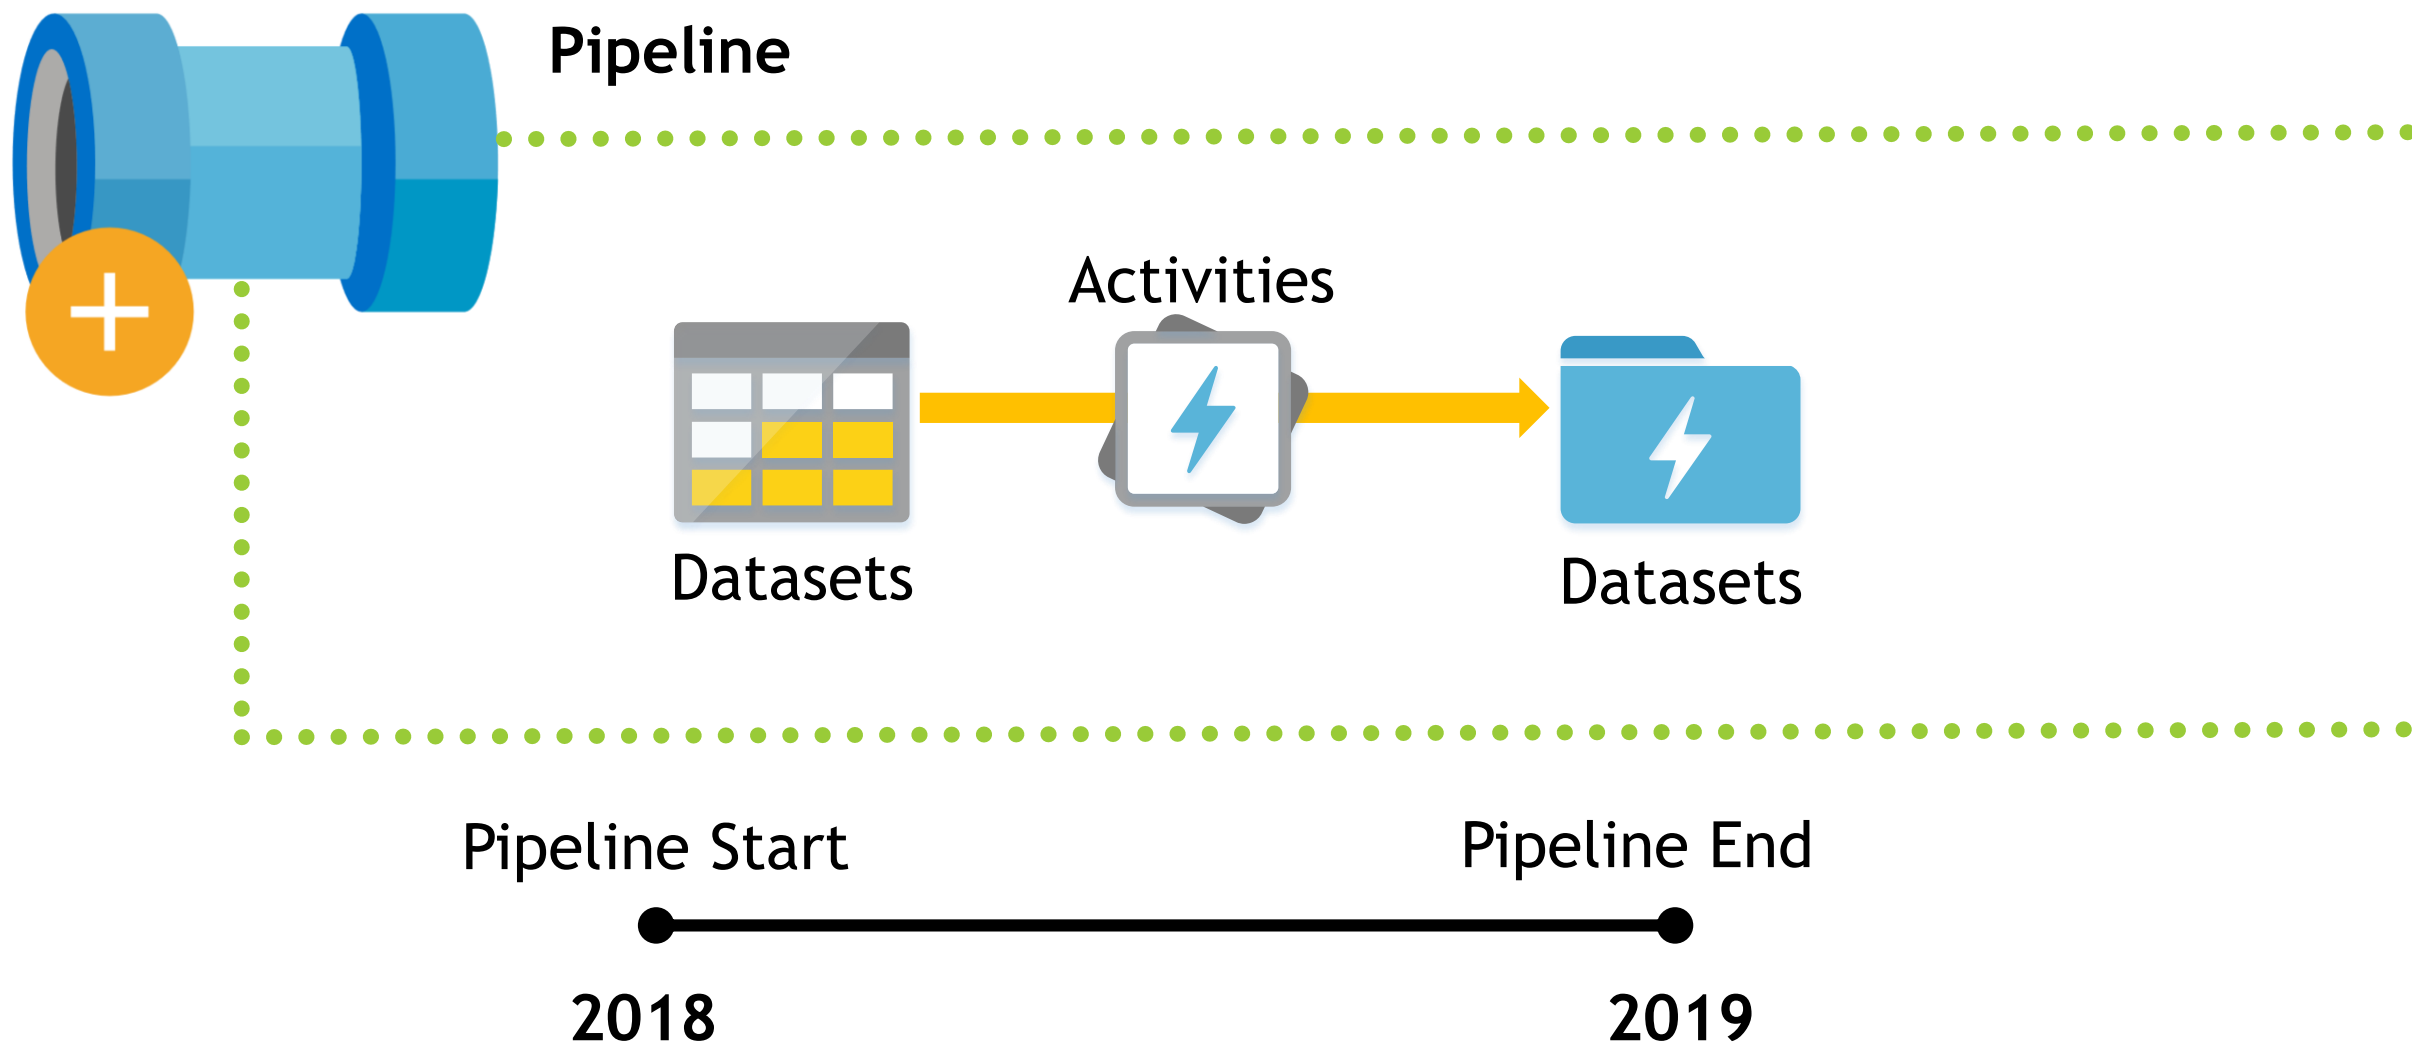

**Activities**

4

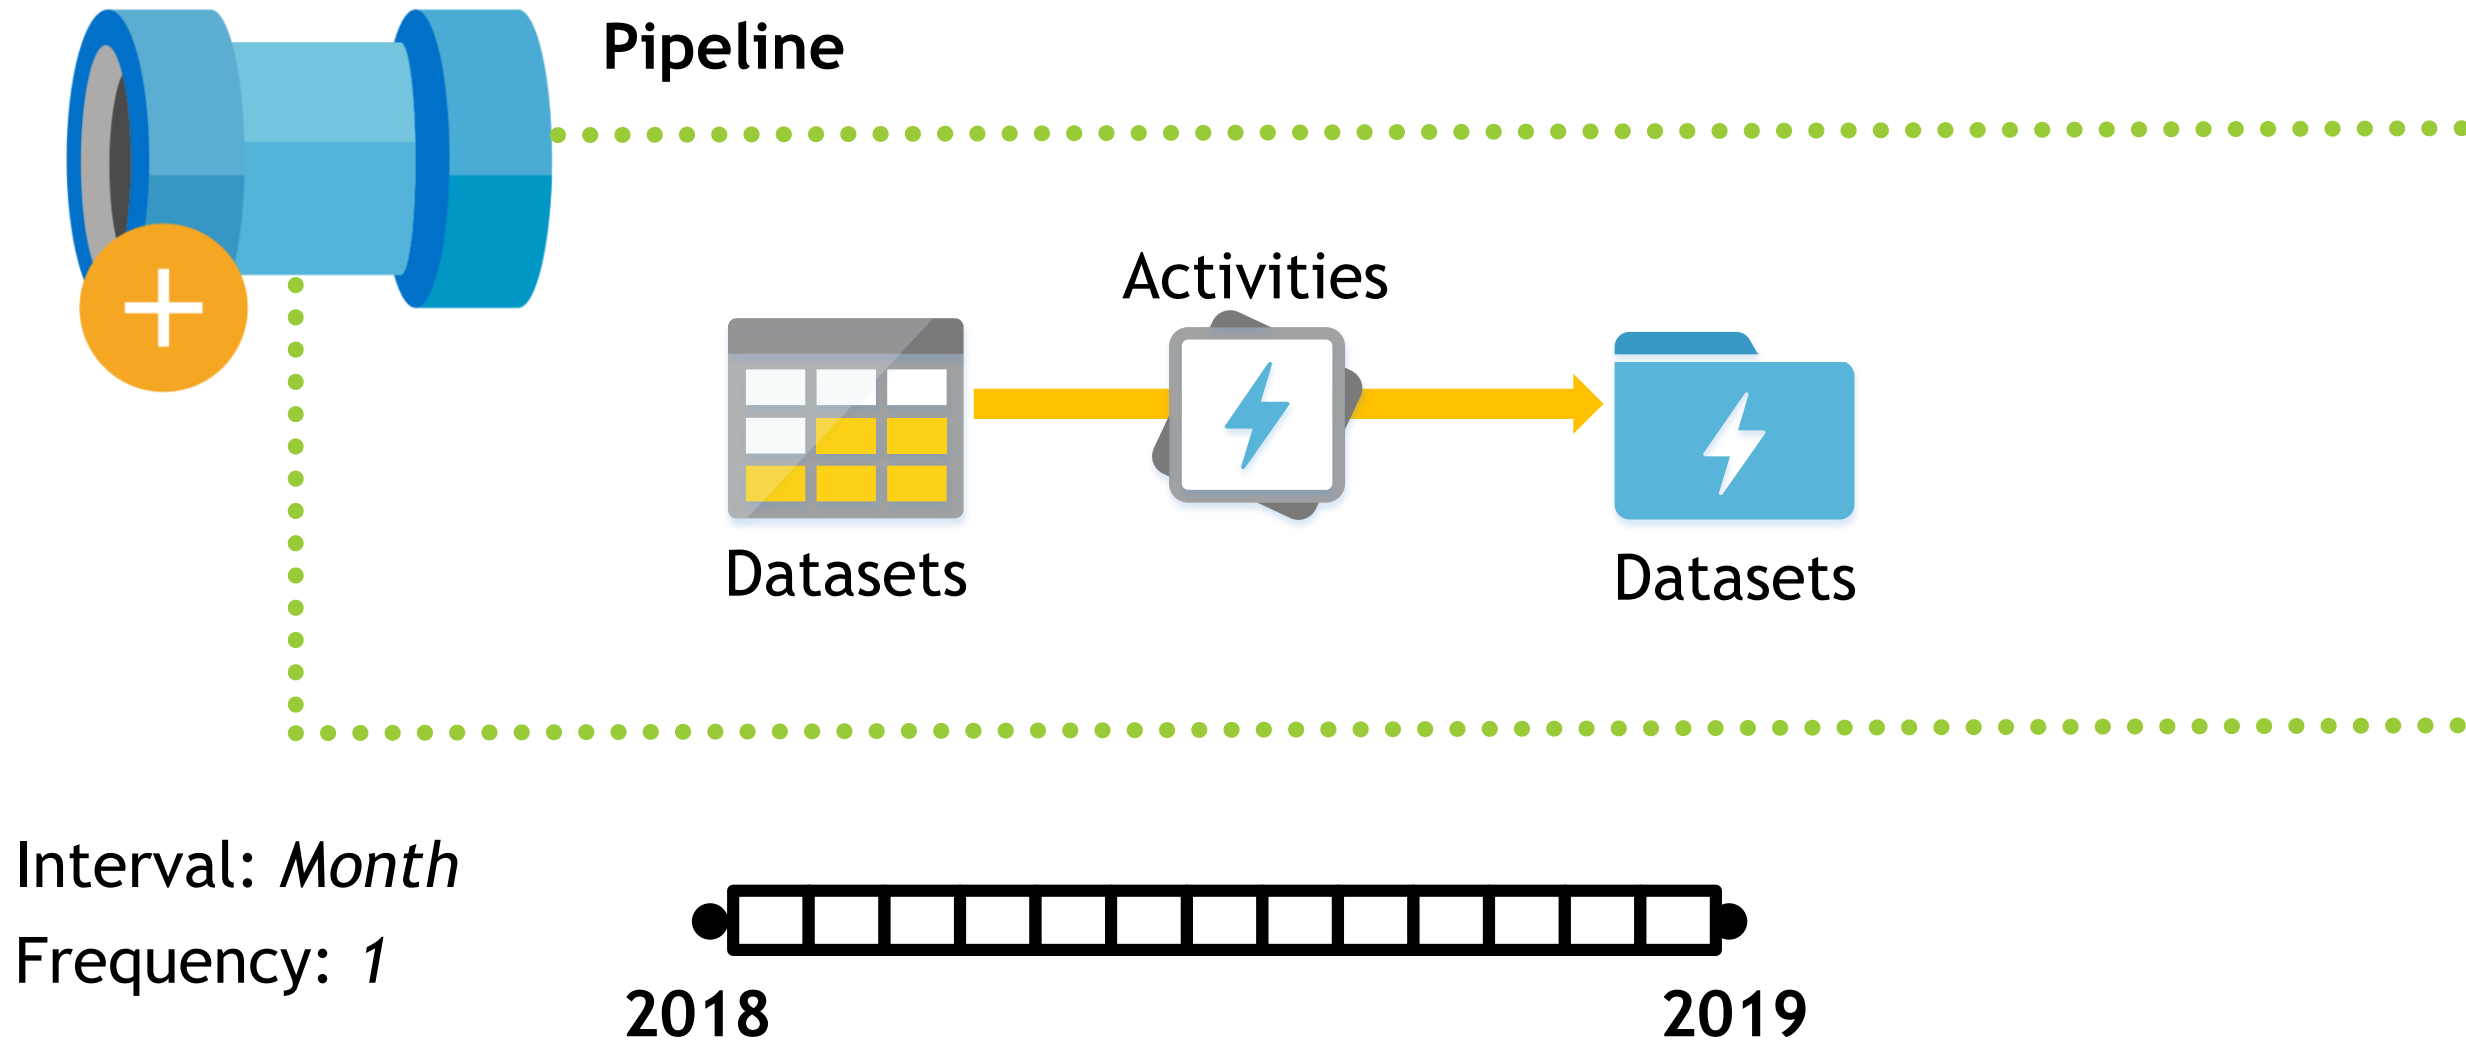

**Pipelines** – What groups of work do I want to do?

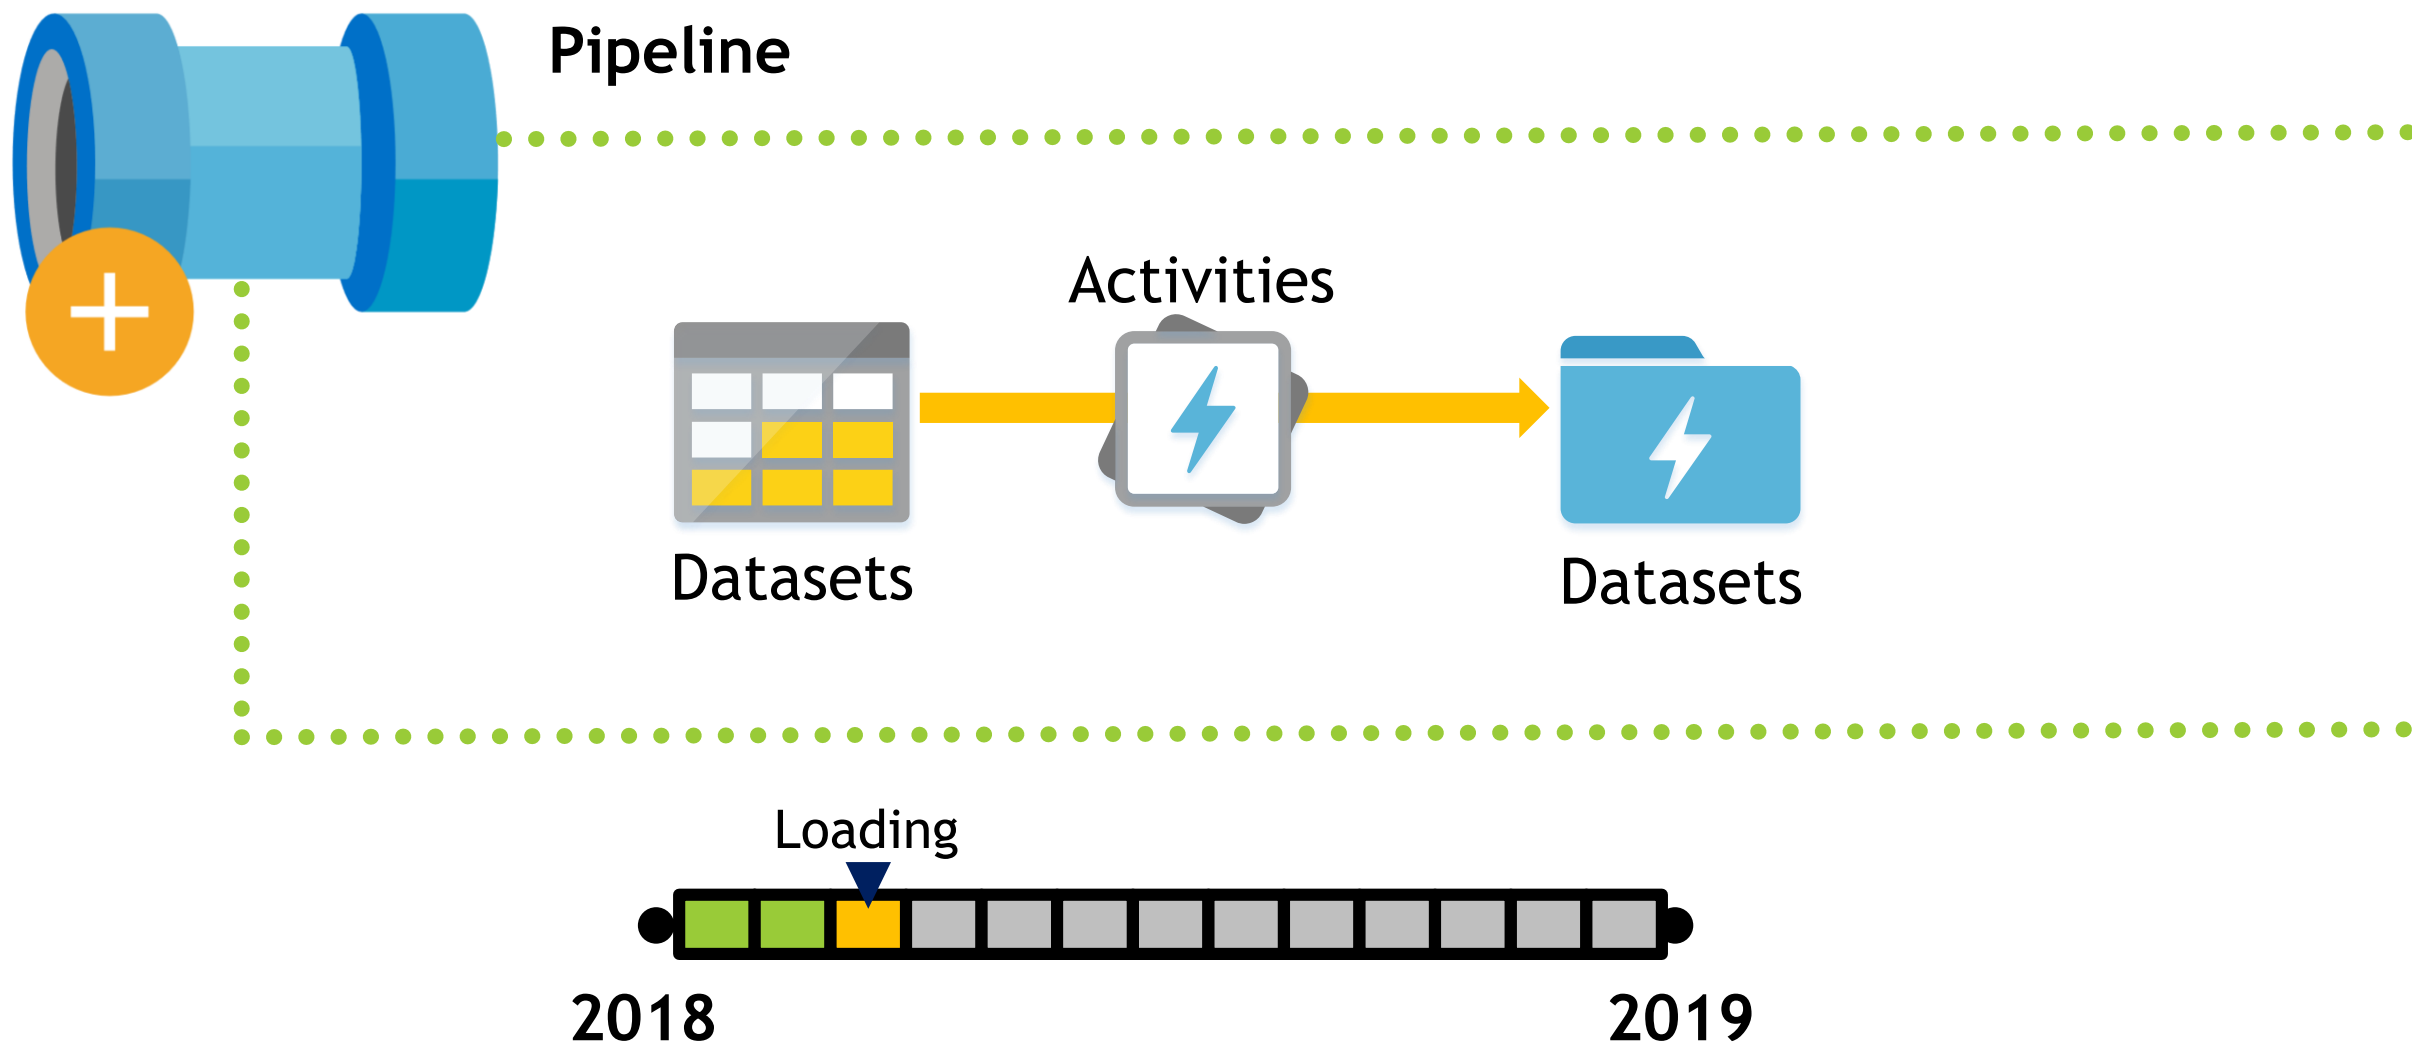

# Azure Data Factory Concepts Continued

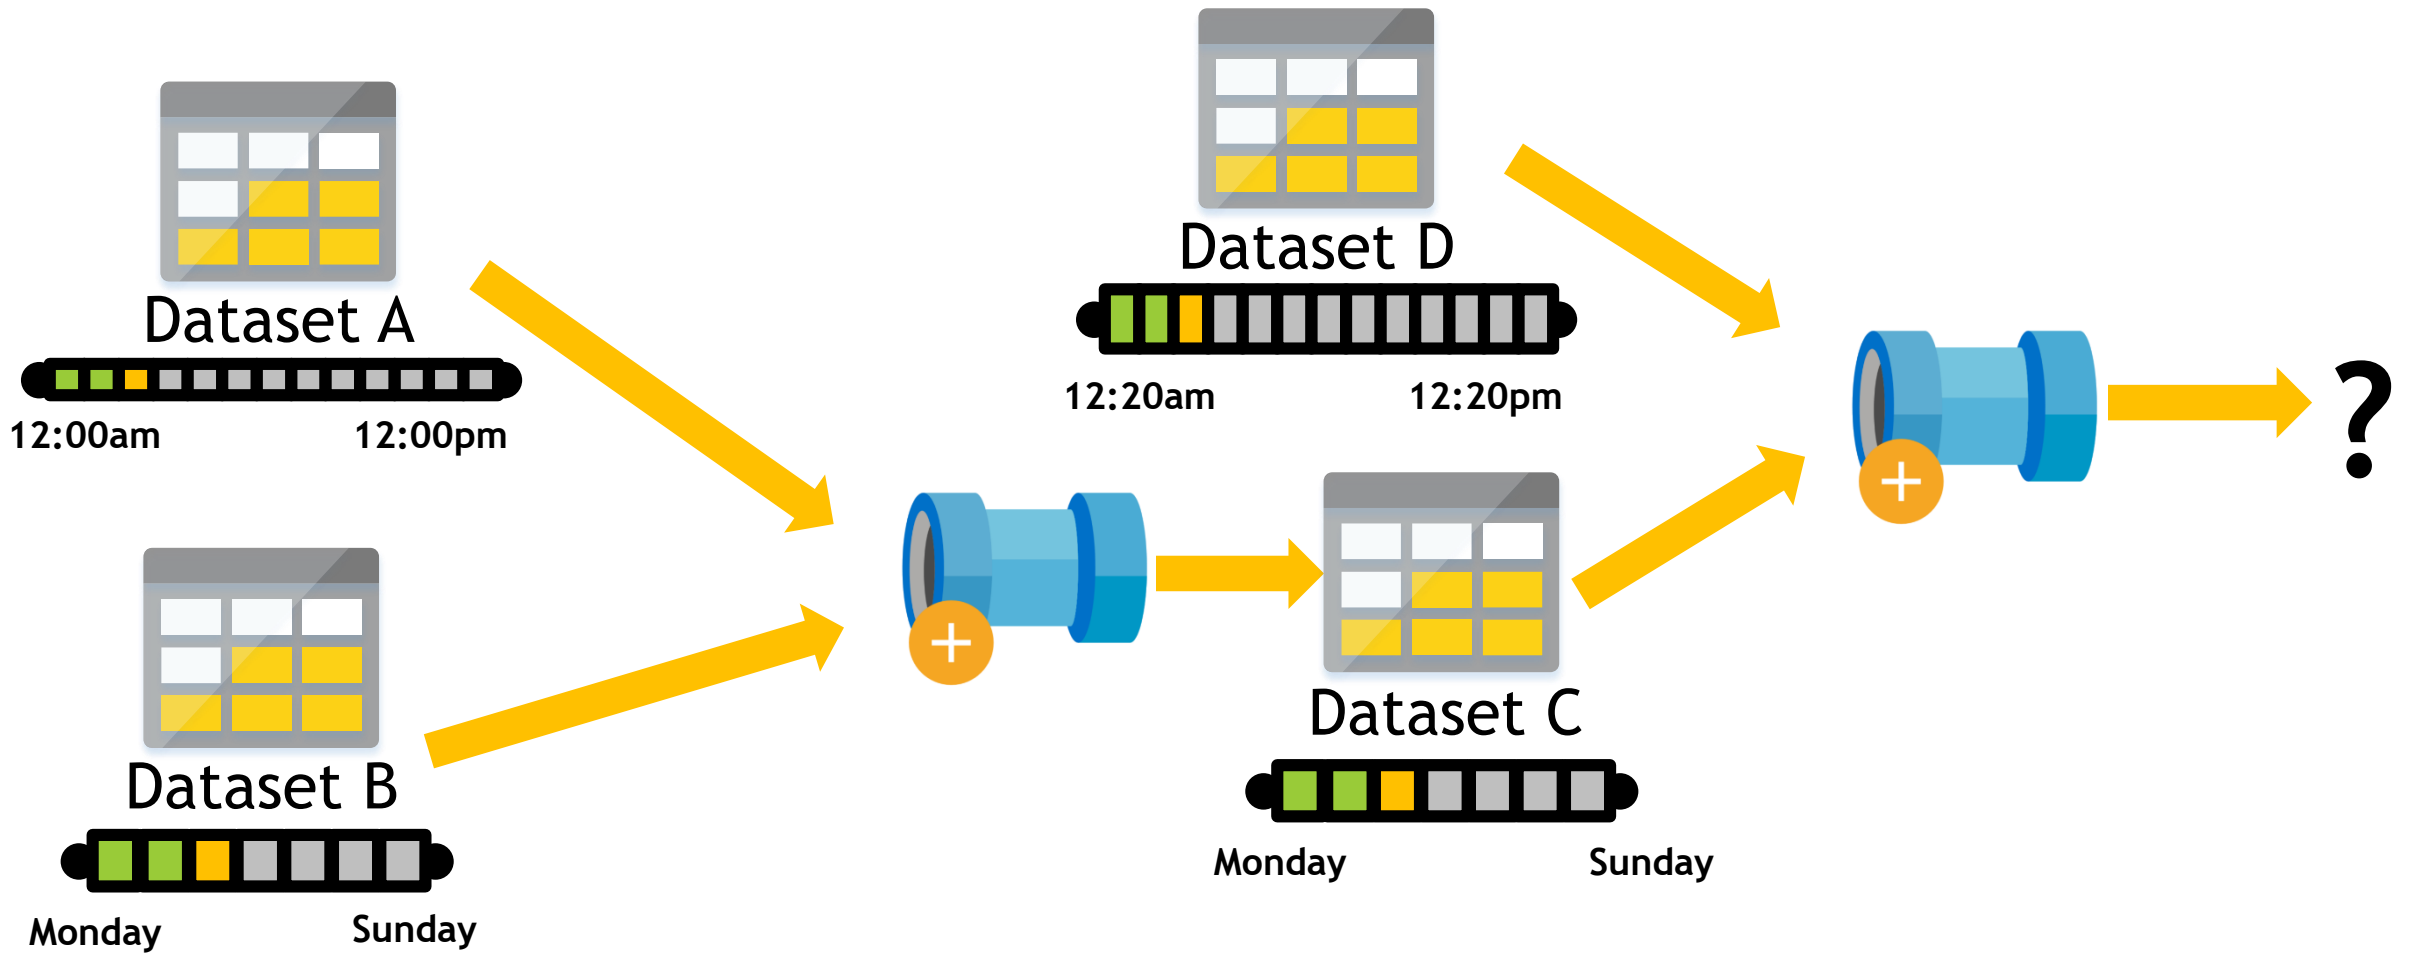

# Azure Data Factory Concepts Continued

# Azure Data Factory Concepts Continued

# Time Slice Problems...

# Data Factory Issues & Limitations

- ▶ **Time Slices** – Complex, difficult to change & provision
- ▶ **Pricing** – High and low frequency
- ▶ **Control Flow** – Not conditional. Pass or fail
- ▶ **Developer Tools** – JSON templates
- ▶ **HardCoded Pipelines** – No dynamic values
- ▶ **C# Extensibility** – Often required for anything complex
- ▶ **Monitoring** – Times slice bound, focused on datasets
- ▶ **Connectivity** – Limited to Microsoft supported linked services

# Agenda

Data Factory  
Recap

ADFV2 Features  
Update

SSIS in Azure

Design Patterns &  
Conclusions

# So What's Changed?

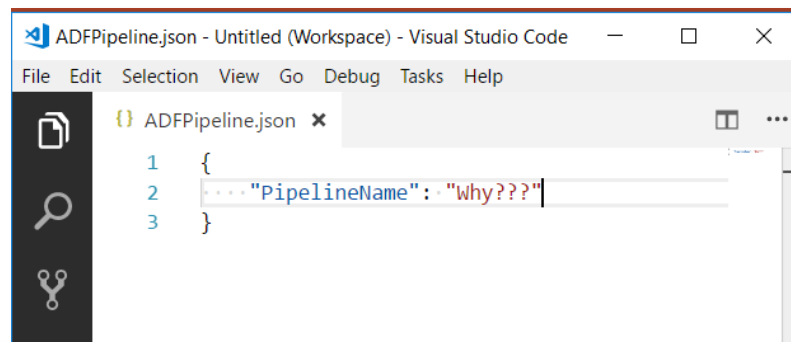

✓	Data Movement (Copy)	✓
✓	Activities	✓
✓	Pipelines	✓
✓	Datasets	✓
✓	Time Slices/Tumbling Windows	✓
✗	Event Triggers	✓
✗	Recurrent Schedules	✓
✗	Parameters	✓
✗	Expressions	✓
✗	Conditional Logic	✓
✗	Use of SSIS Packages	✓

# Development Environments

- ▶ JSON Templates
- ▶ Data Factory Wizard
- ▶ Reverse Engineer From Azure
- ▶ Deployment Wizard

```
ADFPipeline.json - Untitled (Workspace) - Visual Studio Code
File Edit Selection View Go Debug Tasks Help
ADFPipeline.json x
1 {
2   ... "PipelineName": "why???"
3 }
```

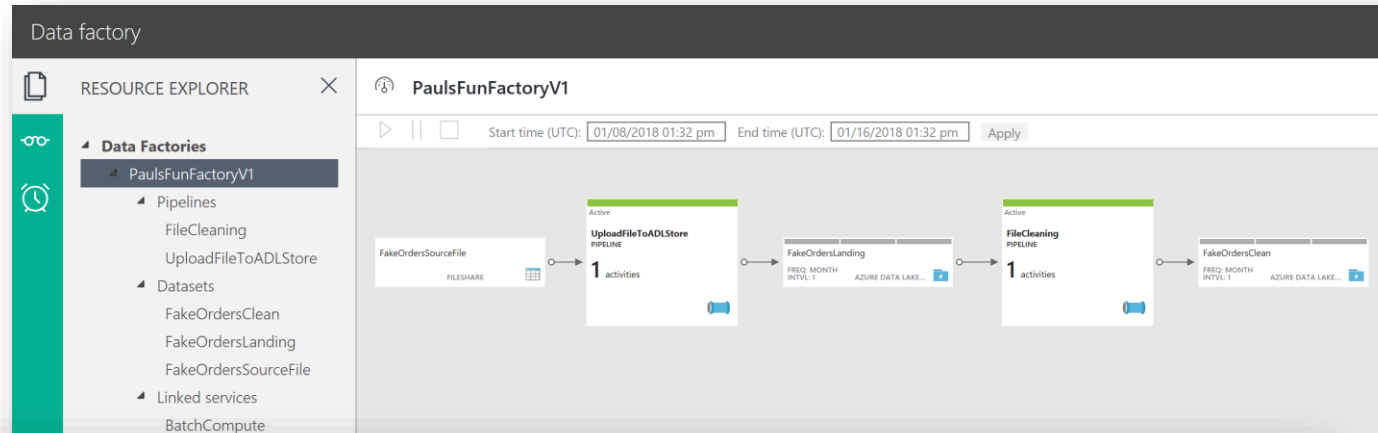

- ▶ No JSON Templates
- ▶ No Deployment Wizard
- ▶ Data Factory Wizard
- ▶ Reverse Engineer From Azure (awkwardly)

# Monitoring

ADFv2DemoFactory01 | Monitor Pipeline Runs

Refresh

Last 24 Hours 01/14/2018 1:35 PM - 01/15/2018 1:35 PM Time Zone (UTC+00:00) London

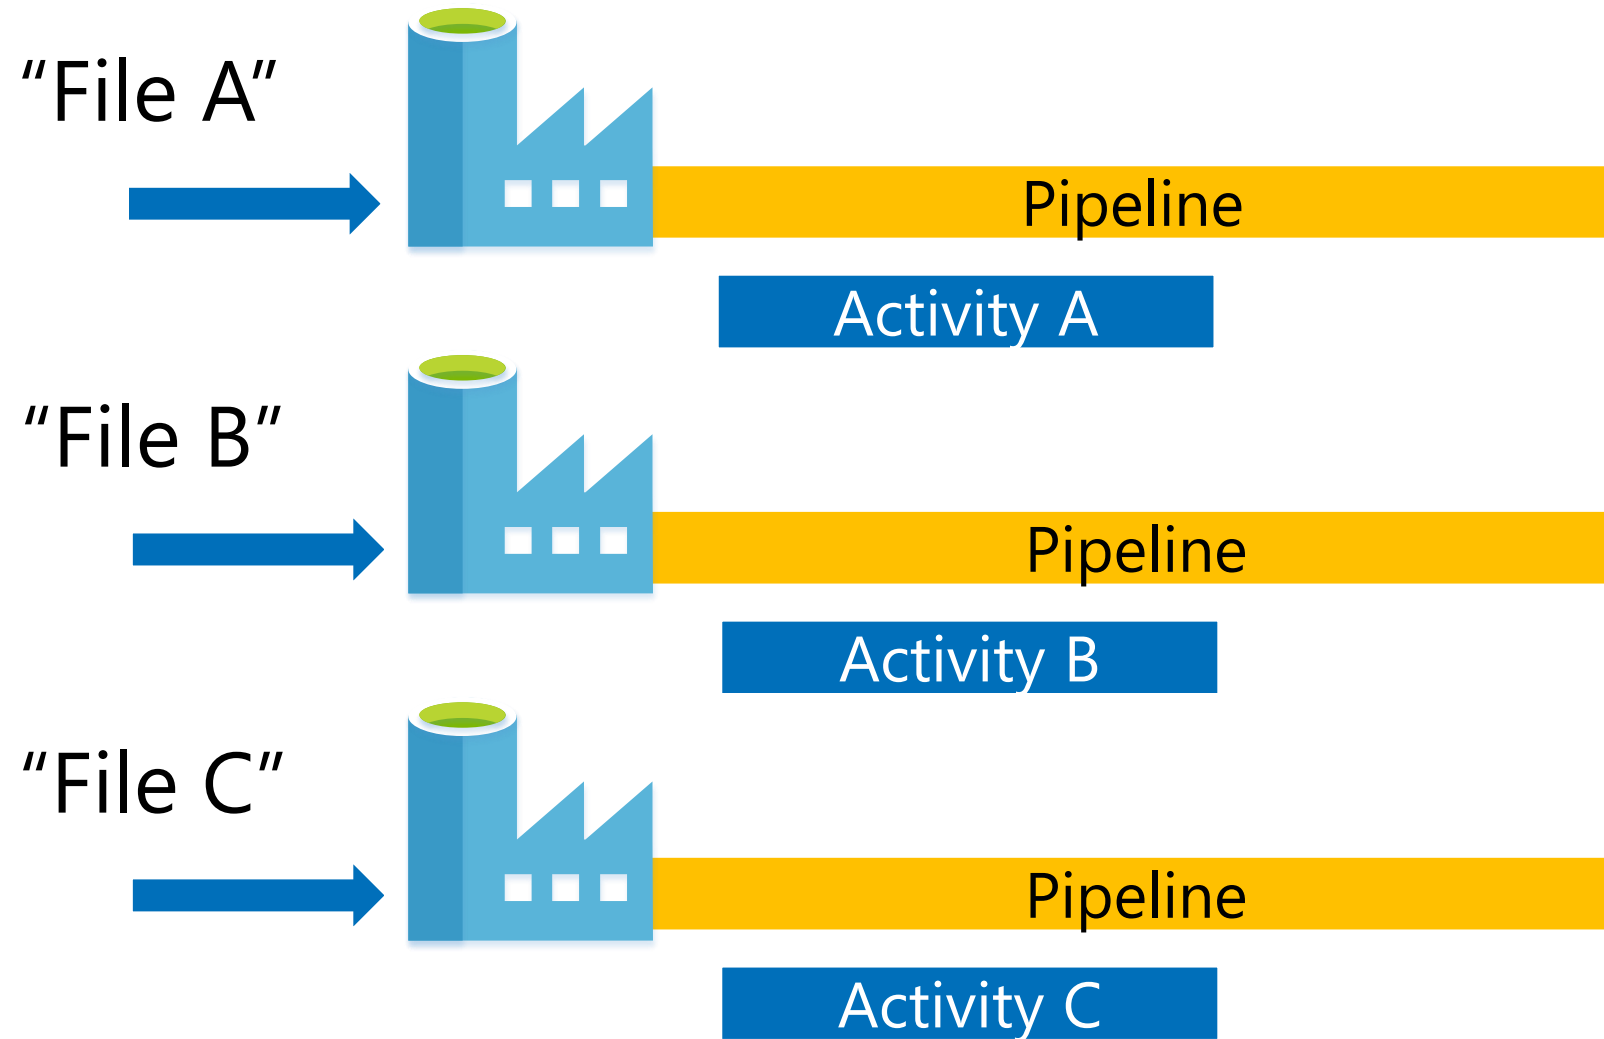

All Succeeded In Progress Failed Cancelled

Pipeline Name	Actions	Run Start	Duration	Triggered By	Status	Parameters	Error
RunSSISPackage		01/15/2018, 1:36:42 PM	00:00:11	Manual trigger	Succeeded		

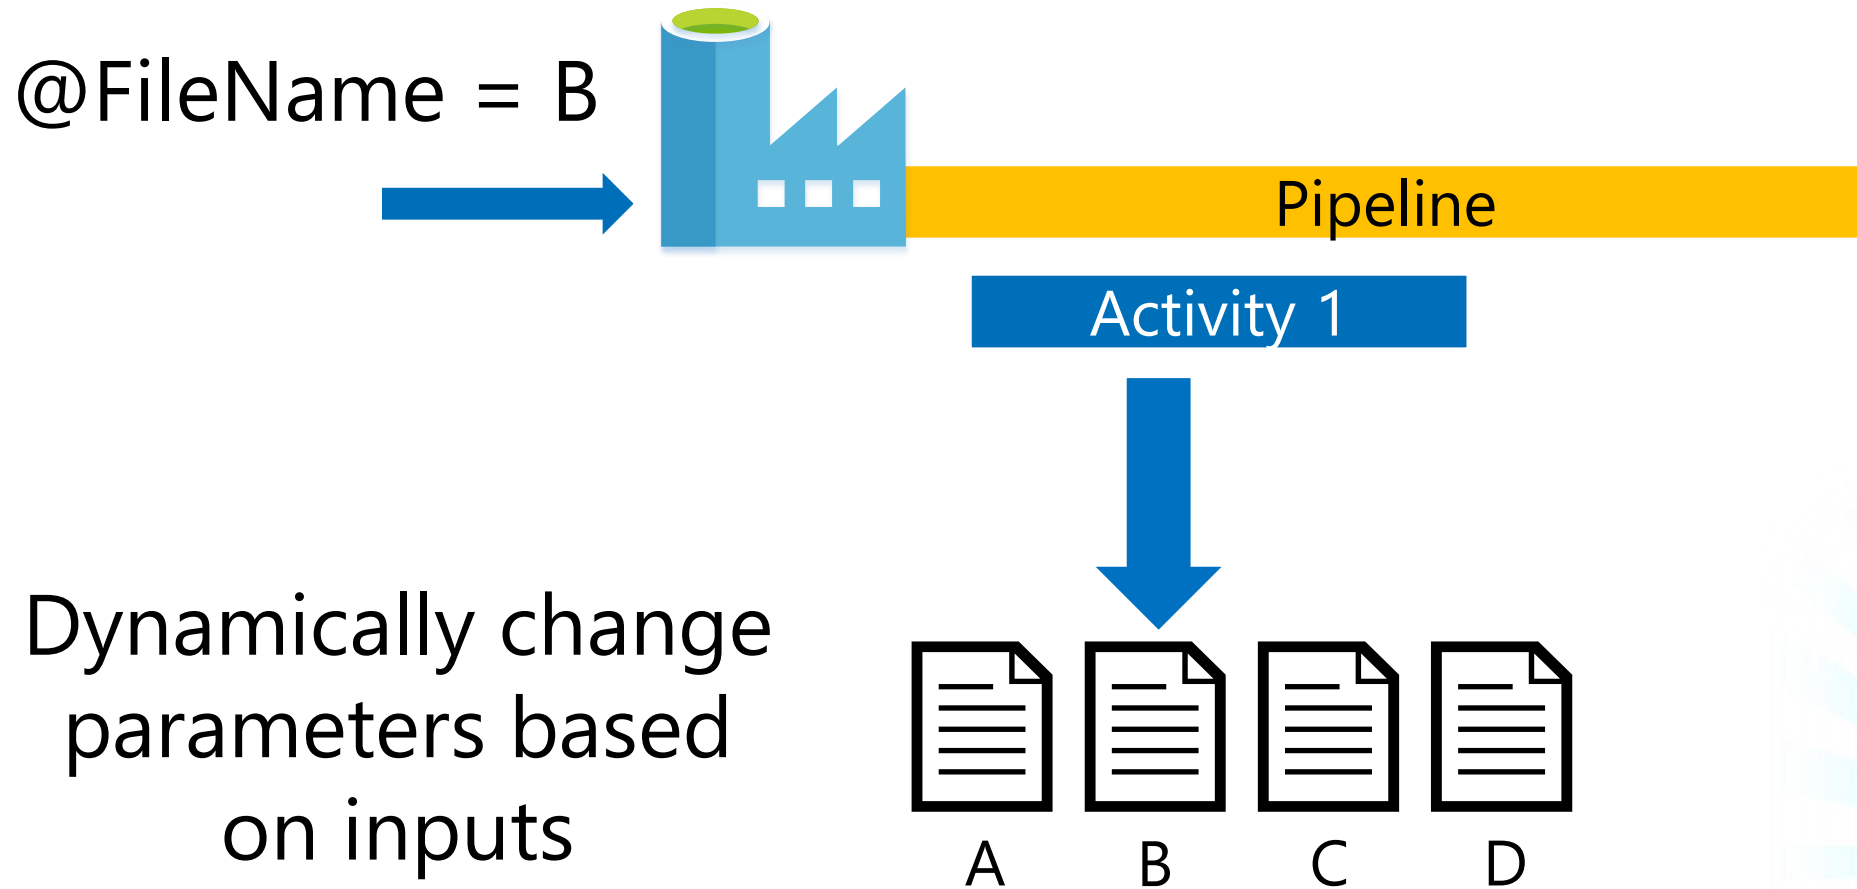

# So what IS good?

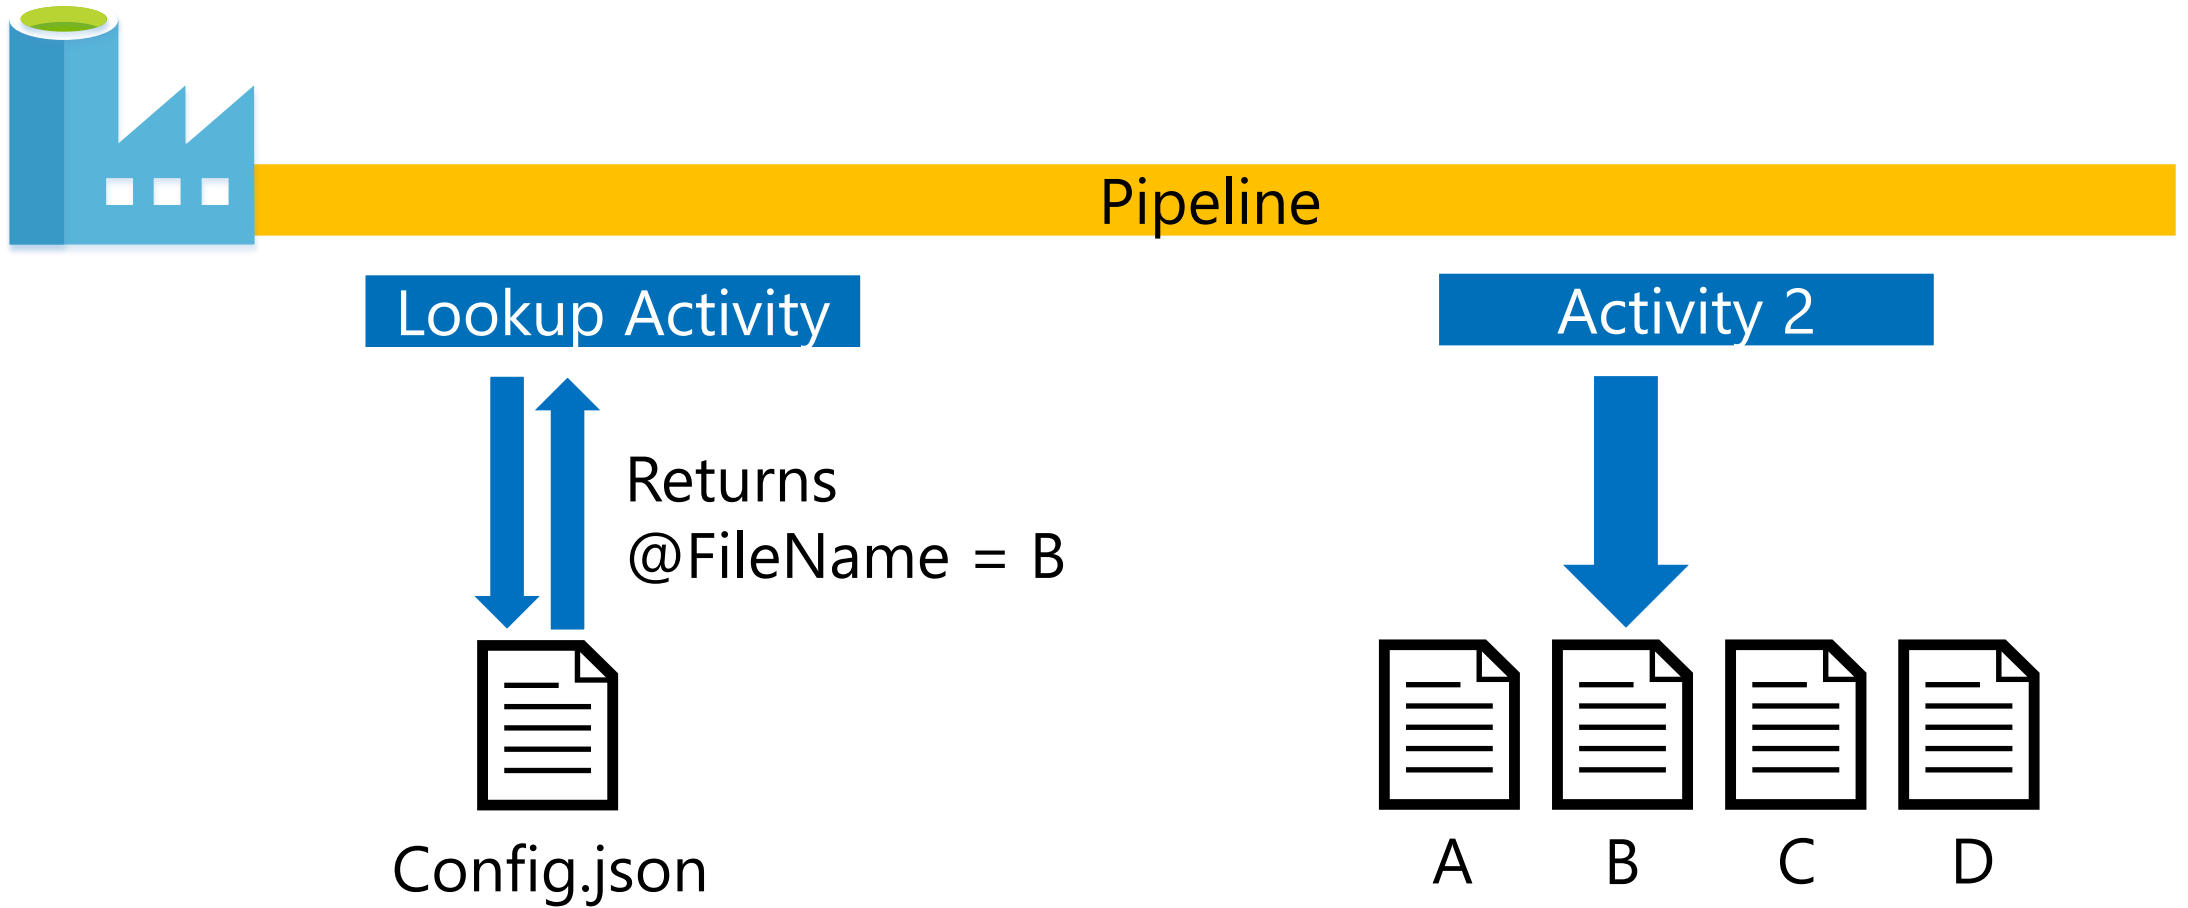

# Hardcoded Pipelines

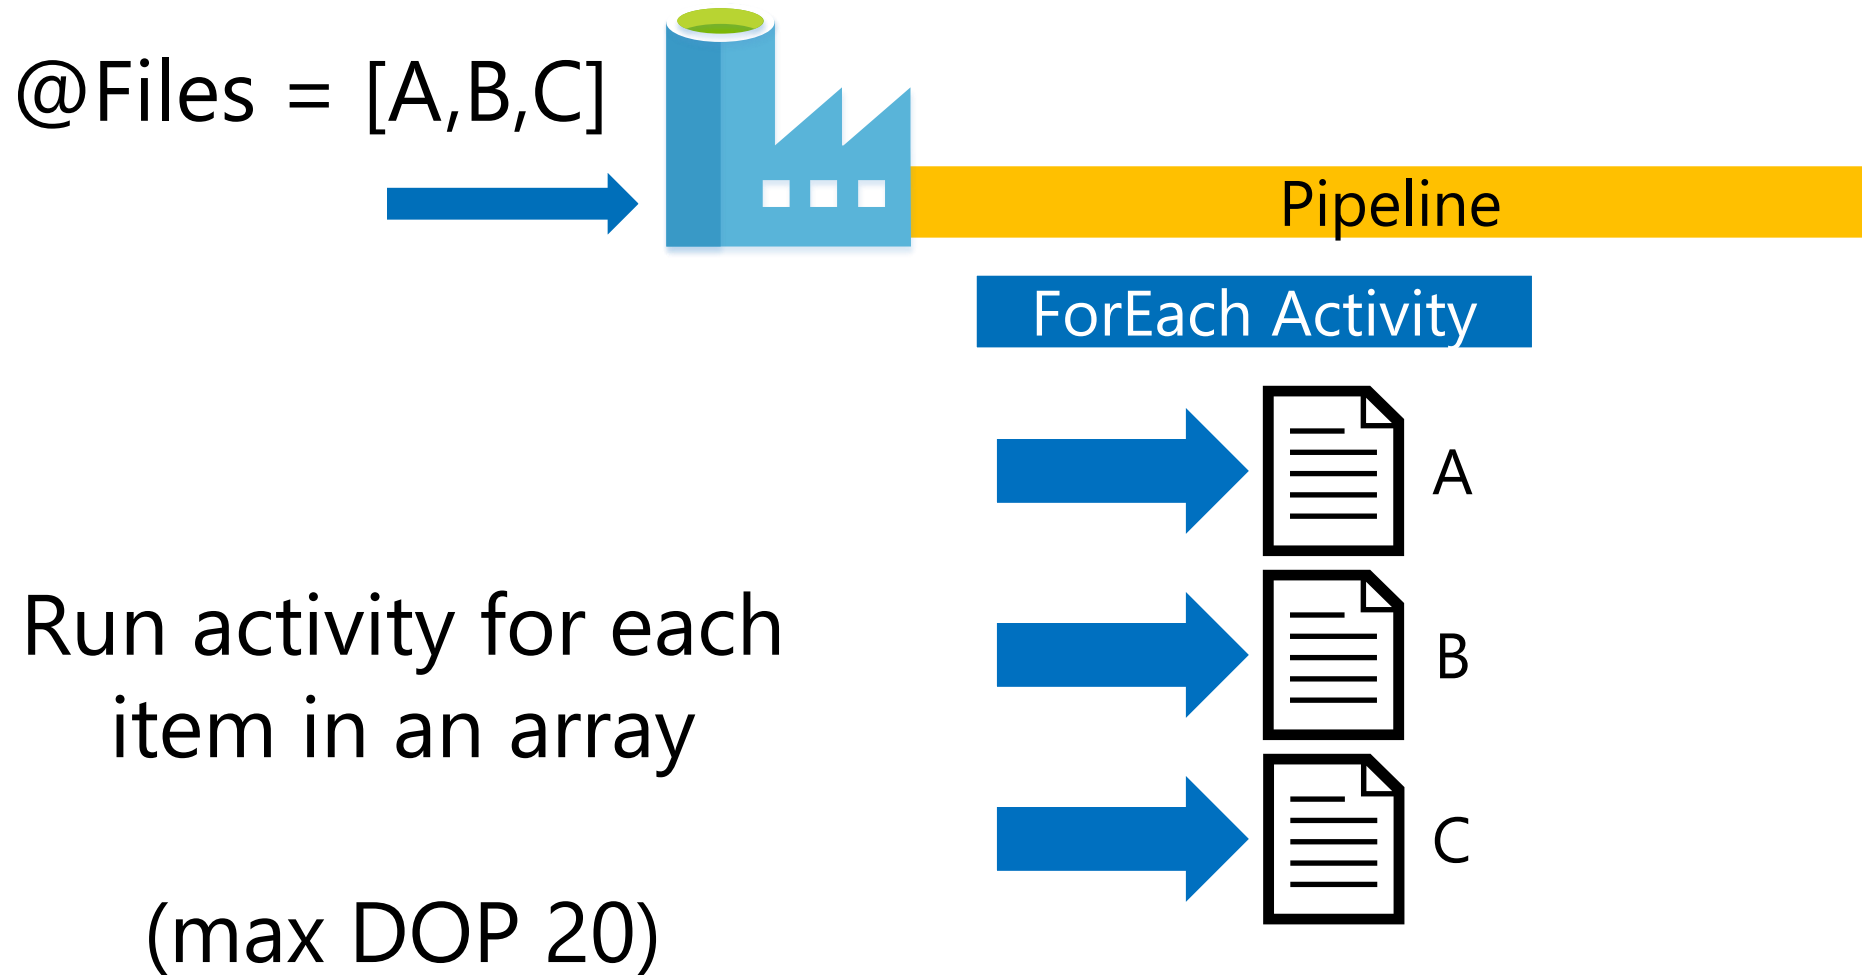

# Dynamic Pipelines using Parameters

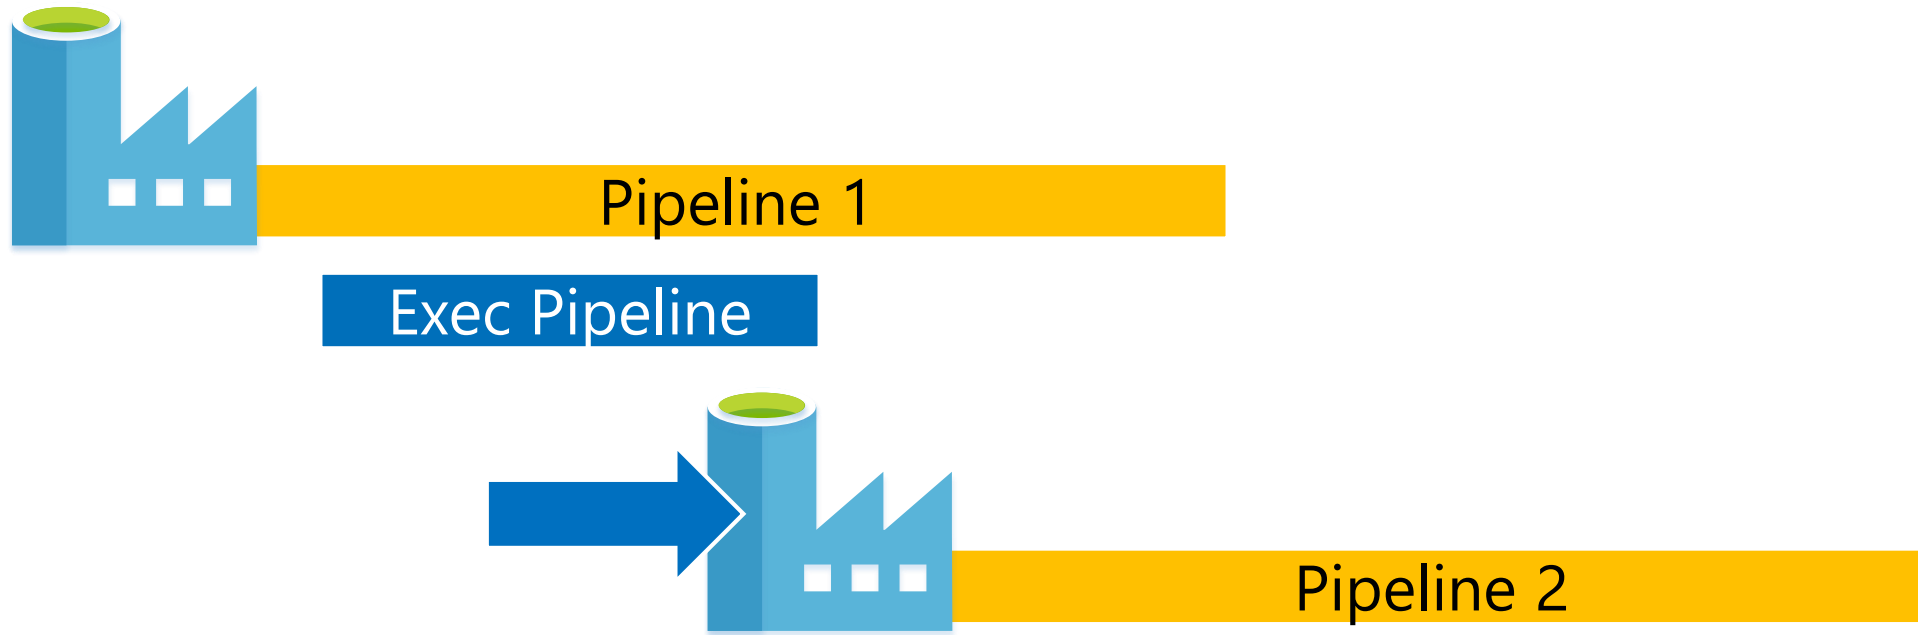

# Dynamic Pipelines using Lookup Activity

# ForEach Pipelines

# Execute Pipeline Activity

# Pipeline Triggers

# Integration Runtimes

1

Default  
Integration Runtime

ADFV2 Features  
Update

SSIS in Azure

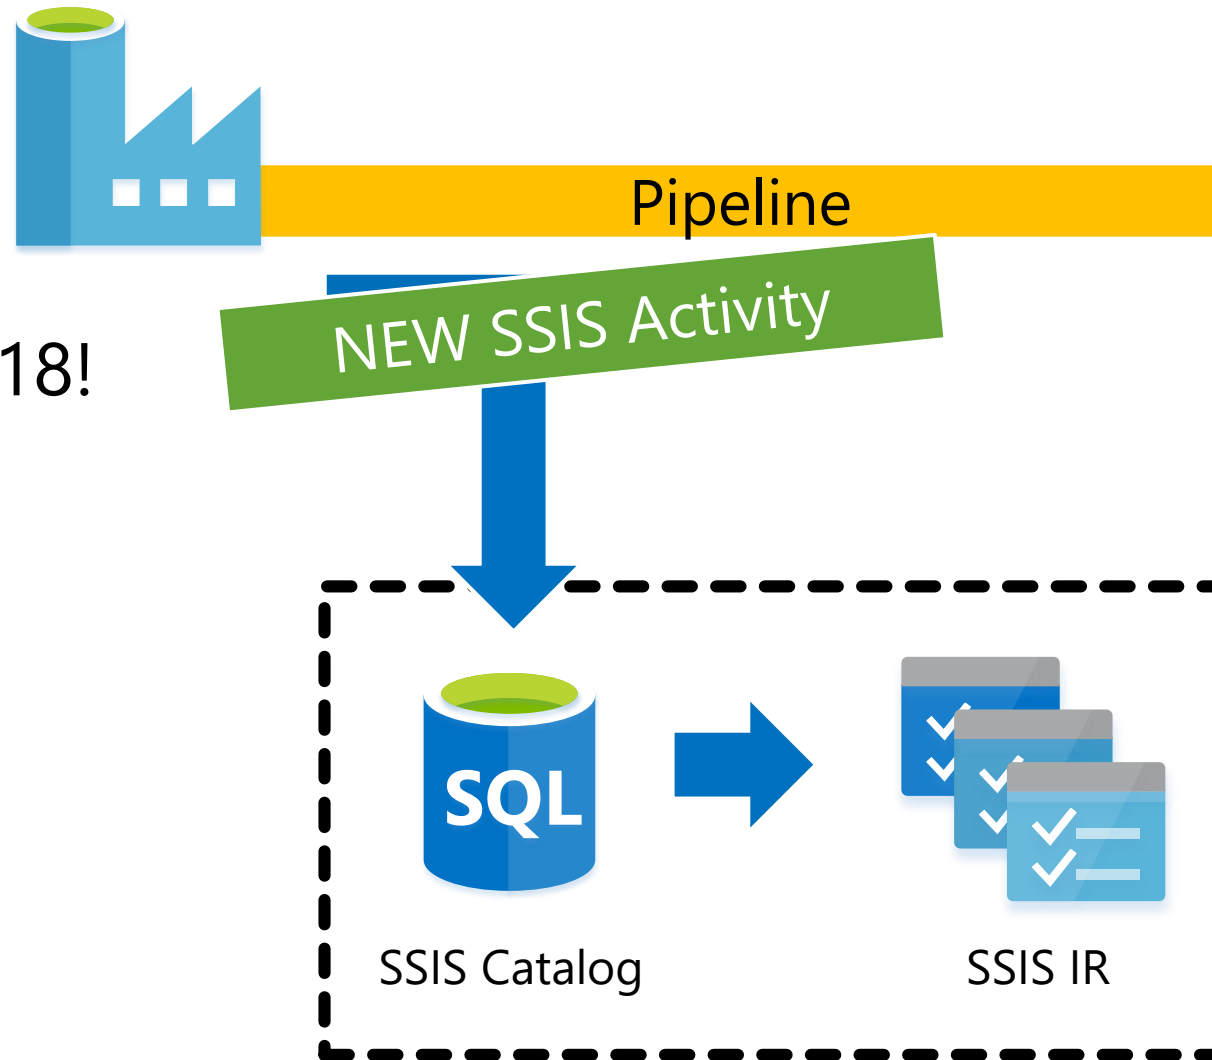

Design Patterns &  
Conclusions

# Back to our Problems...

- ▶ **Time Slices** – **Scheduled triggers**
- ▶ **Pricing** – **Pool of executions. Cheaper the more you use**
- ▶ **Control Flow** – **Conditional activities and iterative behaviour**
- ▶ **Developer Tools** – **Full browser based UI that creates the JSON**
- ▶ **HardCoded Pipelines** – **Expressions and parameters**
- ▶ **C# Extensibility** – **New activities include REST API calls & SSIS**
- ▶ **Connectivity** – **New activities include REST API calls so you can connect to anything!**

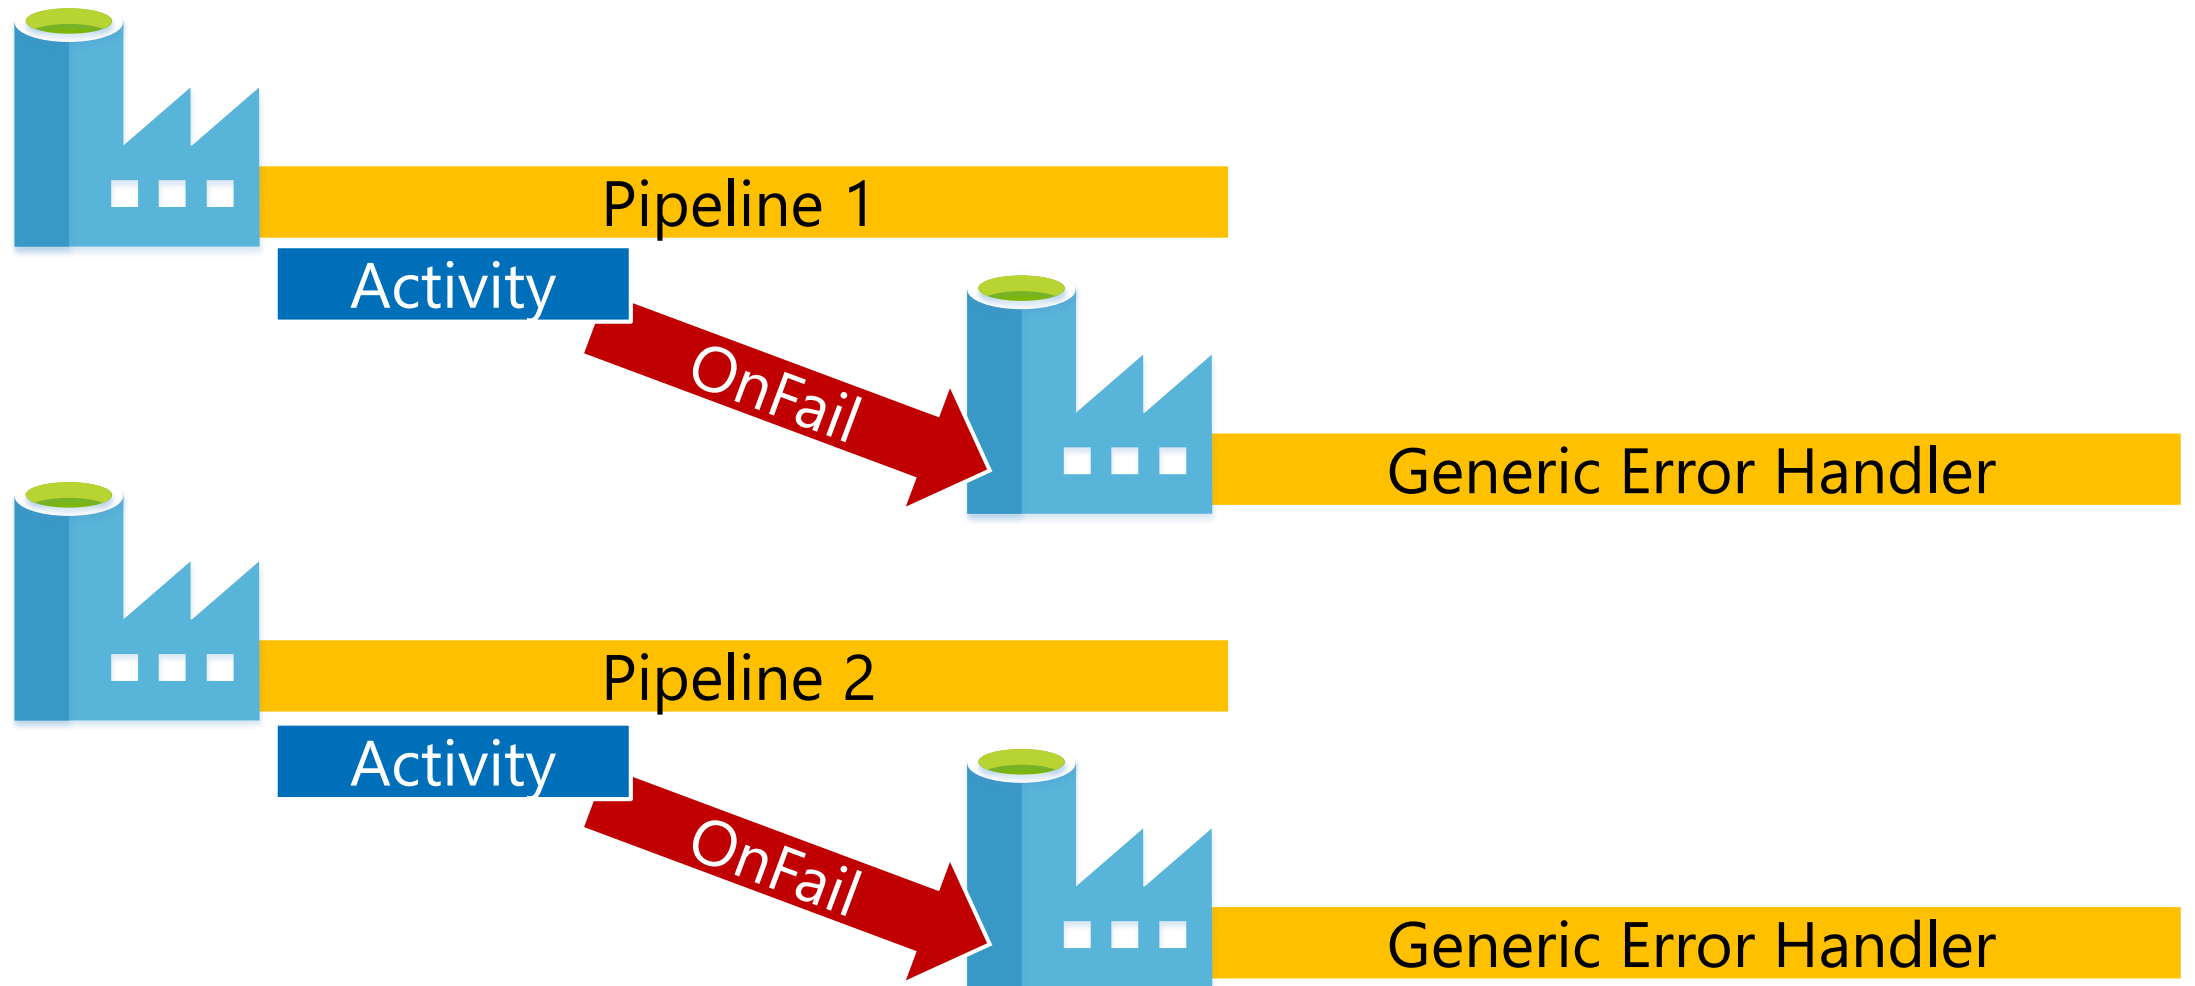

# Reactive Data Processing

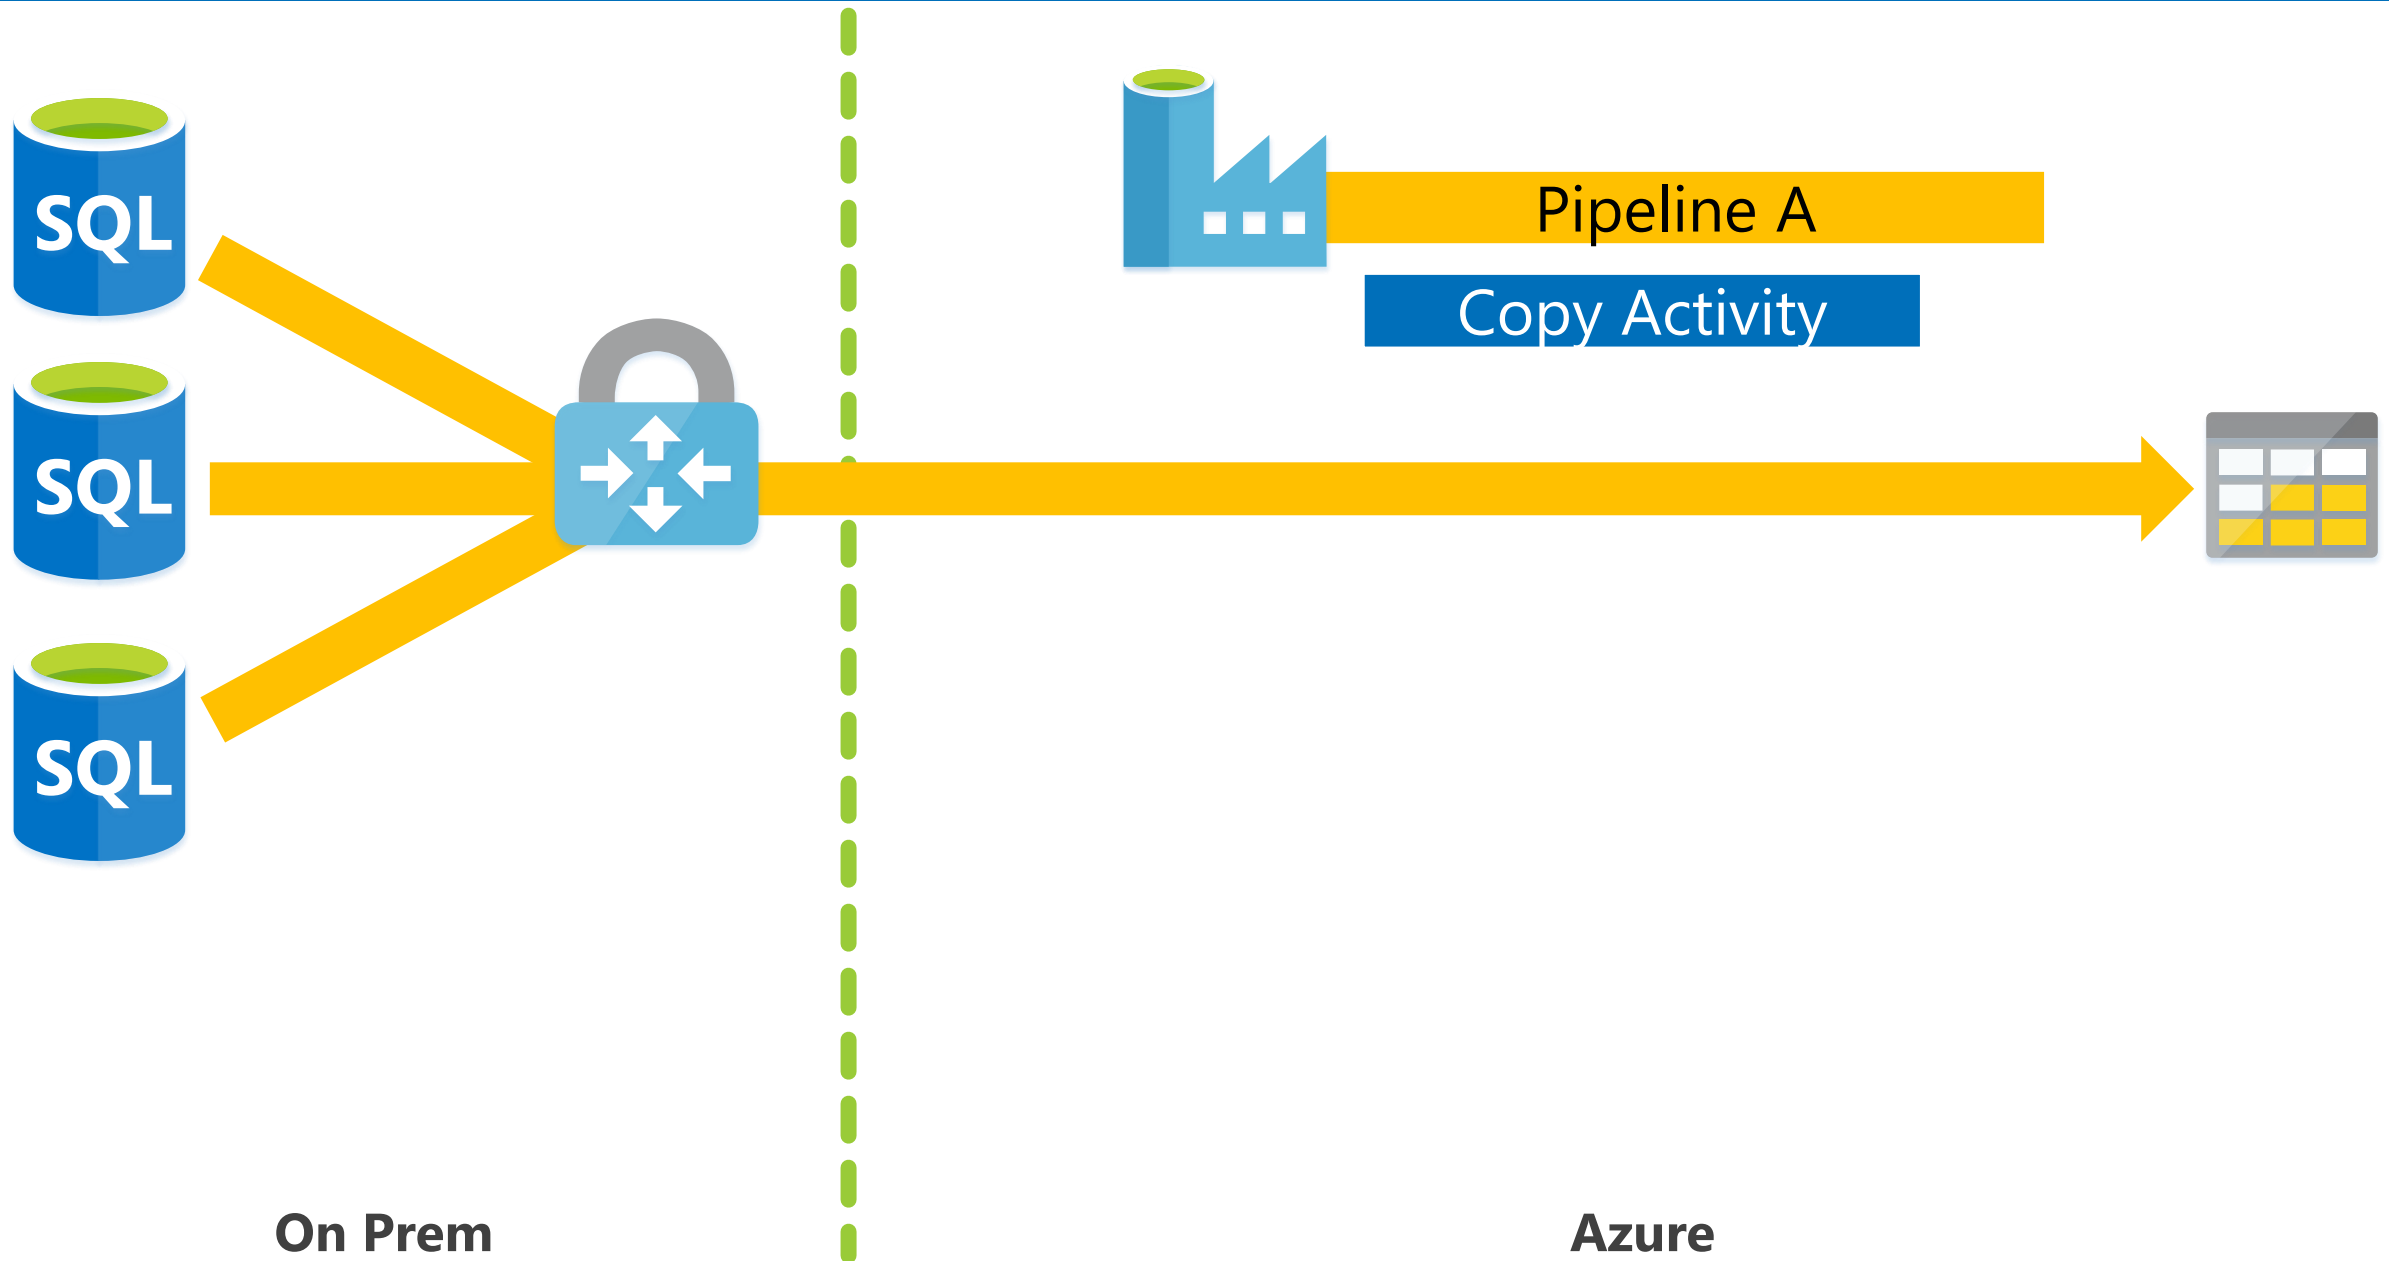

# Batch Queuing

# Reusable Pipelines

# The SSIS Gateway

# The SSIS Gateway

# Thanks for Listening
